Each of these finishes corresponds to a company development of new production techniques able to transform the stainless steel's perception. The ultra-thin Antique sandblasting, combined with charming copper and gold PVD tones, gives the surfaces an extremely sophisticated look.

Perfect to enjoy appetizers with friends, delicious desserts, or for a sophisticated coffee break, the teaspoons sets Oriental and Portafortuna are the perfect gift idea for other or for yourself. They have different extremities, they are available in sets of 2 and 4 spoons, packaged in a white gift box perfect to thank your guests at the end of a wonderful day, or they are in sets of 6 and 12 spoons in an elegant gift box in a warm dove grey.

The special finishes

The particular "**Antique**" finishing is characterized by the pleasant to touch texture and the original matt appearance of the stainless steel. This finishing is the result of an high pressure ceramics sandblasting treatment, made up of micro ceramic particles, which defines the final effect of the surfaces.

This special decoration process is enhanced by the **PVD** - or Physical Vapour Deposition - which gives the objects exceptional colours and shades. It

consists of the deposition of metallic particles through vaporisation in a vacuum chamber. The coating is welded on an atomic level to the flatware's stainless steel, giving the material greater hardness and resistance to rubbing and corrosion, thereby preventing the formation of rust or oxides. Thanks to this process it's even possible to obtain the exclusive Copper and Gold colourings.
