## Sambonet - Twist PVD Colors

### Twist PVD Colors

Twist doesn't go unnoticed. The lines draw a light and at the same time well defined torsional movement. The shapes of this collection express all the elegance and refinement of Sambonet design. Objects that decorate and make every room precious.

The collection is currently available in polished stainless steel and in the refined silver version and it now comes in two new PVD colours. The shining **Copper** is joined by the original **Cognac**, a shade developed exclusively by Sambonet that complements the Sphera Bar Selection line to enrich and express the endless serving options.

The oval cups are available in four sizes: 14x12, 18x15, 22x19 and 26x22 cm. Sleek and versatile, they can also be integrated; by stacking them it is possible to obtain a single, attractive and eye-catching centerpiece. The opportunity to choose from a variety of finishes adds a further play of colour contrasts in a pleasant mix & match of colours and sizes.

### PVD Colours

*PVD, which stands for **Physical Vapour Deposition**, gives the objects exceptional colours and shades. It consists of the deposition of metallic particles through vaporization in a vacuum chamber. The coating is welded on an atomic level to the holloware's stainless steel, giving the material greater hardness and resistance to rubbing and corrosion, thereby preventing the formation of rust or oxides. This is the result of a technological research, along with the endless experience in producing stainless steel that is in Sambonet's DNA.*
