## Sambonet - Twist, Sphera und LineaQ PVD

### A new take on Sambonet Twist, Sphera and LineaQ.

The lines tracing the twisting movement of **Twist**, the soft, round and organic design of **Sphera** and the charming square shapes of **LineaQ** have been given a sophisticated look with new, captivating colours. The mirror and silver-plated range is now joined by a selection of tableware and home decor for each collection in PVD. This colour technique isn't just a coating, it is actually atomically bonded to the surface substrate, making it more resistant to wear and tear, scratches and to the formation of rust and oxidation.

The **Twist** bowls take on an extremely high-gloss, sophisticated appearance in the warmth of the **Cognac**, **Rum** and **Gold** hues, while the **Sphera** presentation plates, bowls, trays and napkin ring are turned into real home decor items in the polished **Cognac**, **Parfait Amour**, **Rum**, **Gold**, **Black** and **Champagne** versions. Last but not least, the tray and presentation plates of **LineaQ** are enhanced with the shimmering shades of **Gold** and **Rum**

### PVD Colours

PVD, which stands for **Physical Vapour Deposition**, gives the objects exceptional colours and shades. It consists of the deposition of metallic particles through vaporization in a vacuum chamber. The coating is welded on an atomic level to the flatware's stainless steel, giving the material

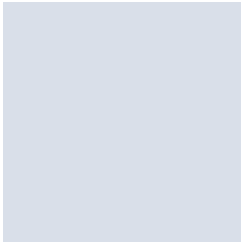

greater hardness and resistance to rubbing and corrosion, thereby preventing the formation of rust or oxides. This is the result of a technological research, along with the endless experience in producing stainless steel that is in Sambonet's DNA.
