## Let it Shine: Designs for more glow and visual harmony at home

### Rosenthal - Phi Lights

Freeze, Spindrift, City, Manhattan, Snow - Rosenthal has translated five avant-garde structures by the English designer Cairn Young into **the extraordinary PHI Lights collection**. Complex geometric patterns cover the white porcelain bodies and transform the lamps into sculptural objects with a surprising 3D effect: triangles become frosty flowers, crystals form snowflakes, cubic bodies form a skyline. The translucent light breaks up the strict forms and plays with the surface of the mat translucent porcelain. This makes the fascinating structure of the objects visible.

### Rosenthal - Nightingale

**The Nightingale table lamp**, designed by Dante – Goods and Bads in collaboration with Rosenthal, quite literally turns the structure and design of a lamp completely on its head: The otherwise normal lampshade of the design piece is rotated 90 degrees, thereby completely redefining the interaction between the light fitting and reflector. The delicate porcelain body is initially reminiscent of an antique lantern, but its thoroughly modern aesthetics shine through thanks to the clear-cut design and soft beam of LED light.

### Rosenthal - La Chute, Squall and Fast

Fascinated by materials' plasticity and limits of deformability, French designer Cédric Ragot designed vibrant vase series for Rosenthal. Whereas the design "**La Chute**" takes up the big questions of creation and finiteness, his object "**Squall**" refers to the already successful vase "**Fast**" created by Ragot in 2007 and preserves a movement in all its dynamics in porcelain.
