Naturally Stylish! Explore the nature with the new Thomas collections

Thomas Trend Colour - New colour "Arctic Blue"

Inspired by the nature of the North, the Trend Colour collection is extended with a new Arctic Blue shade in 2023. The matt light blue, which is particularly accentuated by the fine groove structure on plates, cups and bowls, reminds of glittering ice surfaces at the North Pole and has a refreshing effect. The calm blue tone develops its special glow together with the colours Moss Green and Moon Grey, thus continuing the success story of the design classics Thomas Trend.

All items in the Thomas Trend Colour collection are produced from natural materials and "Made in Germany". Each porcelain item is dipped in a coloured glaze and then fired. Depending on the thickness of the glaze, this creates individual and varied shading effects that give the characteristic design of the British duo "Queensberry Hunt" a fresh and modern look.

Thomas Clay

Thomas Clay impresses with its functionality and the naturalness of the material stoneware, which almost looks like clay here. The grooved structure and the black speckles in the material give the plates and cups an authentic character in a handmade look. The reason for the speckles are iron inclusions that melt during the firing process and give the ceramics that special touch.

The colours Earth, Sky and Rock bring a trend-conscious and stylish connection to nature to the table - whether tone-in-tone or individually combined. This year, a new sensual shade, "Smoke", comes into play.

Thomas Clay - New colour "Smoke"

Reserved, neutral grey speaks of a picturesque morning haze in the mountains, it brings ease and comfort to the table. The calm tone celebrates

a stylish solo appearance in any living space and brings out the natural Thomas Clay colours Earth, Sky, Rock and Rust just as harmoniously.

From Porcelain Pioneer to an International Design Company

Rosenthal products stand out for their design, function, quality and ongoing innovative spirit. Established figures from the worlds of architecture, design and art, but also the smart newcomers and talents design avant-garde dining collections, sophisticated interiors and exclusive gifts. With exceptional craftsmanship, Rosenthal has been producing porcelain "Made in Germany" for more than 140 years. At the same time, the two porcelain factories in Selb and Speichersdorf are among the most modern production facilities in the porcelain industry worldwide and deliver sustainable manufacturing with careful use of resources thanks to the forward- looking investments that have been made.
